Easy Waste Management  
Quick Glance Checklist

***Be Prepared For  
Your Next Adventure***

Outdoor-Life-Adventures.com

A quick glance checklist of gear you will definitely want to have for your RV or Travel Trailer.

## Waste Line - Basic

At least a minimum of 20' Flex Line 2-10' sections & fittings. Easily stores in the rear bumper (if equipped). Sometimes at a dump station you can be close enough to only need to use a 10' section.

[Click For Further Details](#)

Sewer Line Support keeps the bottom of your line secure & even for positive flow to the discharge connection point.

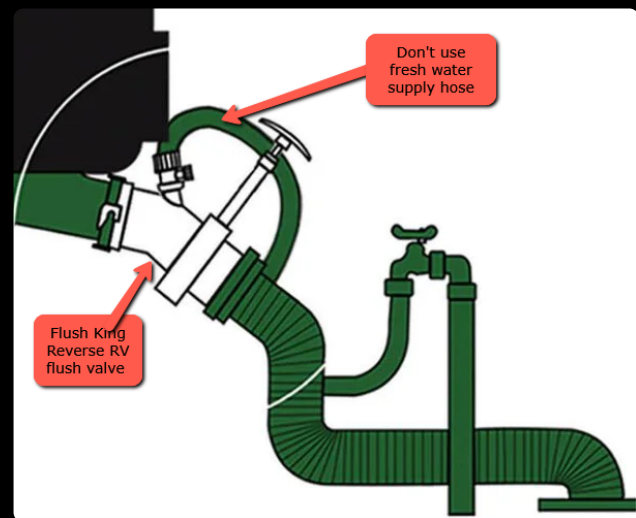

[Click For Further Details](#)

Don't use the same hose you use for your fresh water supply to flush your tanks. Use a separate hose to avoid contaminating your fresh water supply. See diagram at right

25' Gray / Black Water Flush Hose
